PROFILE

Dedicated and skilled Flutter Developer with a focus on GetX for state management and default MaterialApp for UI. Seeking to contribute my expertise in building high-quality mobile applications in a dynamic team environment.

WORK EXPERIENCE

App & iOS Developer

TempConnect, Australia
March, 2024 – June, 2024

- Developed cross-platform mobile applications using **Flutter** with **GetX** for state management.
- Collaborated with designers and backend developers to implement new features.
- Integrated third-party **APIs** and services such as **Firebase** and Google Maps.
- Conducted code reviews and optimized app performance using best practices.

App & Website Developer

EliteLink, Adelaide, South Australia
January 2023 – September 2023

- Provided complete app and website customization and development for the Android and iOS builds of EliteLink, a cryptocurrency website.
- Developed interactive charts and data visualization tools.
- Ensured cross-platform compatibility and performance optimization.

App & iOS Developer

RajFlix Solutions, Munnafer Mor, Rajshahi
October 2022 – December 2023

- Provided complete app customization and development for the Android and iOS builds of **RajFlix Solutions**, an IT Company website.
- Implemented real-time data synchronization using Firebase.
- Enhanced app performance and user experience through rigorous testing and optimization.

PROJECT

Smart Shop

- E-commerce app for seamless shopping experience.
- Technologies: Flutter, Dart, RESTful APIs

BloodLine

- Fully functional blood donation app for Android and iOS.
- Technologies: Flutter, GetX, Firebase
